

AMERANTH *21st Century Restaurant*

21CR Product Overview

- Leading software suite that enables mobile users to easily access most POS features from wireless handheld devices -
- Ameranth's Communication Controller routes and synchronizes information between handhelds and the POS system/database while automatically generating the handheld menus and screens.
- Information is available in real-time, so that handhelds, fixed terminals and the internet may be continually used simultaneously from a single database.
- Deployed in hundreds of locations worldwide - including many of the premier restaurant, hotel, cruise ship, sports stadium and casino locations.
- Ameranth's 21CR software is protected by a strong suite of patents/intellectual property including United States Patent Nos. 6,384,850; 6,871,325 and 6,982,733.

- PLU Ordering
- Login/Log out Security
- Expand/contract view
- Manager Comps/voids

Easy Setup

Automatic Menu Generation on HH

Enables rapid configuration of entire system.

No need for 3rd party software to resize or re-orient menus/display to wireless handhelds.

Changes in fixed POS automatically coordinated with mobile devices

Screen Size

**Automatically resizes POS
menus/displays to fit any wireless
device sized screen**

Network Traffic

Only sends messages to the server on “send” and “print”.

Far less network traffic which speeds up over-all operations

Large Installations

No reasonable limitation to # of hand helds in a system.

Speed is not degraded in large enterprise-wide sites

Screen Orientation

**Automatically changes POS
landscape orientation to portrait
menus/flows for handheld devices
– MUCH more ergonomic**

Credit Card Authorization

Automatically Integrates seamlessly and allows for complete table-side, pool side etc tendering and receipt printing

Scratch Pad

Server can hand write any special modifier/instruction on the touch-screen , which is linked to the appropriate menu item- to be printed at the kitchen/bar printer, thus eliminating the need for direct verbal exchanges for unique customer exceptions-

- great for foreign languages too!

Wireless Help/Hand Book

Hand Held can display menu ingredients, wine list, nutritional data, item descriptions, directions to local establishments/events etc. Ideal for cruise ships, casinos etc

Dynamic Print Routing

Can send to any printer on the network – on-the-fly- i.e. closest one to the server at that time

- even belt printers!**

21st Century Restaurant Value Proposition

Features	Benefits
Tablesides POS Order Entry	<u>Increased Efficiency</u> Faster table turns Reduced labor requirements Order accuracy enhancement
Tablesides/Take Out Payment Processing POS always available	<u>Enhanced Customer Experience</u>
