

FOR IMMEDIATE RELEASE

Texas Federal Court Issues Order Vacating Invalidity Verdicts and Judgment from 2010 Trial

'Court Also Rejects Profitstreams' and Seamless's Attempts to Interfere'

February 7, 2012, San Diego, CA — Ameranth, Inc. announced today that the District Court for the Eastern District of Texas has granted the parties' joint motion to vacate the invalidity verdicts and judgment in regards to 7 of its patent claims which were asserted in a September 2010 trial, thus effecting the parties settlement agreement. Concurrently, the Court denied the improper attempts by Seamless, Inc. and Profitstreams LLC to interfere with the parties' motion for vacatur.

"We are gratified to receive the Court's notice of the Vacatur of the invalidity verdict as to the 7 claims originally held to be invalid in the September 2010 trial. While the verdict only applied to 7 of our existing 47 claims, we are of course pleased to have these 7 claims back as well," stated Vern Yates, Ameranth's Chairman and Chief Executive Officer. *"We are confident that we would have prevailed on appeal if that had been required, considering the weakness of the invalidity arguments at trial and the jury's reliance on improper purported evidence, but this ruling renders appeal unnecessary"* added Yates. *"This vacatur, along with our strategic new patent allowance and our growing number of patent licensees continues the momentum and confirmation of the exceptional value and strength of Ameranth's patents"* said Yates.

Ameranth's pioneering web/wireless data synchronization inventions have been previously patented (U.S. Patent Nos. 6,384,850; 6,871,325; 6,982,733 – with a new patent (with #18 new claims) recently allowed by the USPTO on February 2, 2012, and an additional patent application beyond this new allowance still pending), have been widely adopted and deployed, and are now essential to the modern wireless/web hospitality enterprise. The explosive growth of the use of smart phones, social/affinity group networking, wireless networks and related technologies now make the use and licensing of Ameranth's patents essential to achieve a totally synchronized system, *i.e.*, the 21st Century Communications™ system invented in 1998 by Ameranth's visionary inventors. Modern hospitality information technology systems performing functions such as online/mobile ordering, reservations, ticketing, payment processing and related functionality require the use of Ameranth's patented inventions for synchronized operation. Ameranth has active patent infringement lawsuits against numerous infringing defendants; including Seamless, GrubHub, Exit41, PAR, QuikOrder, OpenTable, TicketMob/Laughstube and the three largest pizza chains - Papa John's, Domino's and Pizza Hut.

The adoption of Ameranth's technology by industry leaders and the wide acclaim received by Ameranth for its technological innovations are just some of the many confirmations of the breakthrough aspects of Ameranth's inventions. Ameranth has received twelve different technology awards (three with "end customer" partners) and has been widely recognized as a hospitality wireless/internet technology leader by almost all major national and hospitality print publications, e.g., The Wall Street Journal, The New York Times, USA Today, and many others. Ameranth was personally nominated by Bill Gates, the Founder of Microsoft, for the prestigious Computerworld Honors Award that Ameranth received in 2001 for its breakthrough synchronized reservations/ticketing system with the Improv Comedy Theatres. In his nomination, Mr. Gates described Ameranth as "one of the leading pioneers of information technology for the betterment of mankind."

About Ameranth, Inc.:

Ameranth, Inc. (<http://www.ameranth.com>) is a recognized leader in the hospitality technology market, having been featured in the *Wall Street Journal*, *New York Times*, *Chicago Sun Times*, *USA Today*, *Business Week*, *US News & World Report*, *Nation's Restaurant News*, *Hospitality Technology*, *TIME*, *CNNfn*, *San Diego Union Tribune*, and numerous other prestigious publications.
